Risks

Negative risks:

1) Hackers that can hack the app.

2) Insufficient budget.

3) Inaccurate information.

4) Internet disconnection.

5) Exploration of street vendors for our tourists ,lack of good organization,and failure of the work ers to do their duites.

6) Lack of confidentiality between workers.

Positive risks:

1) Make achange on the app to improve it by keeping up with technology.

2) Hirring some secret workers to ensure the safety of the employees.

3) App that can work on both ios and android.

Solutions for risks

1)we can nomination professional programmers to protect the security of the app.

2)We can have partner in my project to avoid insufficient budget.

3)We can test the information by professional employees to make sure that the information are correct.

4)We can make the app avaliable without internet to avoid internet dis connection.

5)We should spread the principle of cooperation to avoid any problems between workers

to do their best and that is a benefit for the project.

we can monitor our project by seeing all the tasks that had done and

seeing all the work frequently.
